

## **MiraCell FAQ's**

### **What is the active ingredient in MiraCell?**

No one ingredient is attributed to the success of MiraCell. Instead, every ingredient is part of MiraCell's success because. Each ingredient fills a specific skin need in maintaining skin health that provides MiraCell with the ability to renew your skin quickly, safely and effectively.

### **What happens if I accidentally dropped MiraCell into my eye?**

Do not be alarmed if you happen to drop MiraCell in your eye. Although your vision may temporarily become blurry for 1-3 hours, MiraCell will not harm your vision. Your eyes will naturally flush the oils. \*If problems persist beyond this period, please contact your optometrist.

### **Should I be concerned if my child ingested MiraCell?**

If ingested, MiraCell may act as a mild diuretic, depending on amount ingested. But it will not cause any internal harm. Though safe & natural, MiraCell is designed for external use only. Please contact your physician if your child shows unusual symptoms.

### **Will MiraCell help with my athlete's foot or on my warts?**

No. Athlete's foot and warts are fungi and need to be treated accordingly.

### **Why is MiraCell so expensive?**

For the quality, MiraCell is a great buy because MiraCell ingredients are 100% natural. Natural oils are more expensive because they are not easily accessible. Most plants do not naturally produce or secrete oil. To obtain this oil, a great amount of plant material must be collected. To yield even a modest amount of oil the oil can only be collected during a certain moment of the plant's yearly cycle. Consequently, the amount necessary to extract the oil increases the cost. [Just-One-Drop](#)

Less-expensive products may claim to be "just like MiraCell", but they are not, because they combine a little bit of natural ingredients with a lot of useless fillers, making it less effective in reviewing your skin. Because MiraCell is concentrated and without fillers, you will use less, thus making it very cost effective.

### **How long will MiraCell take to work?**

It depends. Most results are immediate-especially for bites and burns. For more stubborn long-term problems, we recommend you use MiraCell for 3 to 4 weeks to see results. If you have been regularly using products on your skin that contain mineral oil or glycerin, your skin will go through a "transition" period and will require a longer application period for results.

MiraCell will provide quick results on bites, stings, sunburn, rashes, cuts, itchy ears, chapped lips and dry skin. Moderately quick results on sores, dry cracking skin, ear aches, recent surgery scars, acne, keloid, diaper rash and burns. Long term results on psoriasis, eczema, roseacea, old scars, and shingles.

### **How can I incorporate MiraCell into my cosmetic routine?**

Substitute MiraCell for your moisturizer and mascara remover. MiraCell will moisturize your skin and smooth out wrinkles. Use MiraCell before applying your foundation, to create a more even and balanced tone. First apply a light application of MiraCell on a clean dry face, and then apply makeup as usual.

MiraCell also works as a safe and gentle mascara remover! To use, apply a small amount of MiraCell on eye to loosen mascara. Wipe off with a warm wet cloth. Reapply MiraCell to moisturize the delicate tissues around the eyes.

### **Do I need a prescription to use MiraCell?**

No. Unlike drugs or other products prescribed by a doctor to treat specific skin conditions, MiraCell is an over-the-counter product and does not require a prescription. Drugs require prescriptions as a safety measure. It is safe, gentle, and effective to help your skin achieve optimal health.

### **How should I apply MiraCell to my skin?**

Simply drop 1-2 drops on your skin and rub into the area desired. For your face, place one drop on each cheek, forehead and chin, and spread over the surface of your face. Then spread 1-2 drops over your neck.

MiraCell is highly concentrated, meaning you only need a few drops to treat your skin. For example, one drop is enough MiraCell to cover the back of your hand. For larger areas of skin, apply 4-5 drops.

### **What makes MiraCell different from other skin products?**

One-of-a-Kind, only MiraCell uses this unique botanical blend that helps skin

- Anywhere on your body, head to toe for over 37+ uses
- Just 1 drop, even less than 1 drop is effective on most skin needs and problems because it is 100% concentrated with highest quality botanical extracts – no fillers, no cheap ingredients.
- Highly specialized blend – formulated specifically for skin. Every ingredient in the MiraCell formula fills a specific role in skin renewal.
- Proprietary. MiraCell's formula legally belongs to our company. Others may claim to, but cannot match this amazing blend.
- Ear canal health – a most delicate, important area of unique skin. There are only 3 layers of skin in your ear, compared to 7 layers in your arm – also 3 areas of invasive response. MiraCell calms delicate and sensitive ear problems. Designed to be absorbed and utilized by any skin cell to achieve its mission.

### **Why does my skin feel greasy after I use MiraCell?**

If your skin feels greasy after you apply MiraCell, you are using too much. Because MiraCell is 100% concentrated you only need 1-2 drops per (small) application, which should be absorbed into the skin in 20 seconds to 2 minutes. MiraCell's concentration makes it an unusual one-of-a-kind product. Refer to our "Just One Drop" link for more information. [Just-One-Drop](#)

### **What is the skin care system that is talked on this web page?**

MiraCell was originally in a cosmetic line called Signaire. In 1999, MiraCell was pulled off the line and is now sold separately. Signaire is not presently available. Watch for a full MiraCell skin care line in the near future!

### **Why do you use propylparaben in MiraCell?**

Because our ingredients are honest naturals; sometimes—if the lid is left off, if exposed to heat or dirt, if other things get mixed in—bacteria or fungus can get into the product.

To protect you and your products, we add two preservatives to MiraCell, myrrh and propylparaben.

Both have anti-fungal and anti-bacterial properties. Both are non-toxic and non-irritating to skin.

- Myrrh, an ancient natural preservative from the Mediterranean
- Propylparaben, a food grade preservative used in cosmetics and skin care products. Just a tiny amount of propylparaben prevents bacteria and fungus in products.

Other "natural" preservatives exist. But to be as effective as myrrh and propylparaben, they require such large amounts they can irritate the skin.

In over 18 years of selling MiraCell, not one person has experienced irritation from this gentle, non-toxic formula. Clinical tests reveal MiraCell has zero toxicity and no adverse affects.

### **Can I use MiraCell under sunscreen?**

Yes! Apply MiraCell and wait 5-10 minutes for it to absorb into your skin. Then apply sunscreen as directed.

Listen to what success Shelia P. had in using MiraCell on her skin:

“My dermatologist said, ‘Your face shows not one minuscule evidence of sun damage and the skin on your face is ten years younger than the skin on your neck.’ I’ve used MiraCell and the skin care on my face for over ten years and now I’m using it on my neck!”

### **What are the ingredients used in MiraCell?**

All of MiraCell’s ingredients are natural, gentle, and non-toxic. A list and description of MiraCell’s ingredients can be found here. (Put link to web page of ingredient list here)

### **Can I use MiraCell on my baby?**

Yes! MiraCell is safe and effective for your baby! It works great on rashes (diaper rash), cradle cap, and earaches. Everyone of any age can use MiraCell.

### **Can I use MiraCell when I am pregnant?**

Yes! MiraCell is absolutely safe to use during your pregnancy. Its especially helpful in preventing stretch marks if used as your tummy expands before delivery!

### **I recently had surgery and my scar is still fresh (pink). Can I apply MiraCell to it?**

Yes! As soon as the wound has closed and your physician has approved its use. MiraCell users have reported noticeably less scarring when they have applied MiraCell directly after surgery. Please be sure to clean the affected area daily to minimize infection.

### **How can I become a distributor?**

We are happy to supply your business with MiraCell. Simply call 800-748-5040 with your business license and reseller’s number. One of our friendly customer service representatives will set up your account and ship your order that same day!

### **What is MiraCell’s shelf life?**

MiraCell’s shelf life is usually 3 years from date of manufacture. Each bottle has its expiration date printed on the bottom. To maintain MiraCell’s shelf life, avoid extreme heat and direct sunlight. Keep the lid securely on the bottle to protect MiraCell from contamination, especially if you’re using MiraCell outdoors, i.e., camping or at the beach.

### **Why does MiraCell work on so many different skin conditions?**

**Because your skin is intelligent.** Skin functions much the same anywhere on your body. Given the right nutritive materials to work with, it will **rebuild and repair itself**. Safe, gentle and natural, MiraCell gives your skin full strength nutritive support. So **wherever you have skin, MiraCell works its magic**. Absorbing quickly into dry or troubled skin tissues, MiraCell gives both quick and lasting relief to your skin as it goes through its renewing processes.
